In claim 1, after line 12 add -- and outputting the acquired data. --

In claim 11, line 14 change -- . -- to -- ; -- .

In claim 11, after line 14 add --and outputting the acquired data. --

Allowable Subject Matter

Claims 1-24 are allowed.

The best prior art of record particularly Hamann (US 2004/0091557) teach The force readings are expressed in g(grams) as the maximum force needed to don the glove, e.g, " frictional donning force.", however Hamann does not teach the following claim limitations.

The primary reason for the allowance of claims 1-24 is the inclusion of the limitations of an a glove mount having at least two spaced apart glove seats diametrically opposed one from the other and a device for measuring effort associated with donning of a glove; mounting a glove for testing on the glove mount so the glove is stretched over the opposing glove seats and held in place by friction in an open and donnable arrangement.. It is these limitations found in each of the claims, as they are **claimed in the combination**, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 12-24 is the inclusion of the limitations of an having at least two spaced apart glove seats diametrically opposed one from the other and stretching the glove over the opposing glove seats. It is these limitations found in each of the claims, as they are **claimed in the combination**, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
